

SE 317: Introduction to Software Testing

Quiz 1

Open-Book

Total Points: 15

This is a **reverse quiz**. You will prepare the questions and answers yourself.

Instructions:

- Provide (at least) 15 questions **with model answers** for each question.
 - At least 8 “multiple choice” questions. Each multiple-choice question will have at least **5 choices for answer**, one right and 4 wrong answers. A valid answer could be “*none of the above*”, or “*all of the above*.”
 - At least 7 questions will be in form of essay questions (Q & A)
 - **Trivial questions will not be accepted.**
 - Do not use any questions from the textbook or lab book questions at the end of chapters.
 - Do not use any questions from the lab assignments.
 - Use all lecture and book material to form your questions and answers.
 - Only use material **covered in class**.
 - Your questions must be from the topics we covered in the textbook (Ammann & Offutt) as well as the lab book and lectures
 - Use all chapters covered in class (Chapters 1, 2, 3, 7)
 - Questions must come from multiple chapters.
-

Rubrics:

Clarity: Question is clear and easy to understand (30%)

Conciseness: Question has a clear concise answer (30%)

Relevance: Question and answer comes from the class material (40%)

Good luck,
